

## Lead Marine Engineer

### Company & Role

Royston is a dynamic and expanding diesel engine supply, service and repair company that has operated successfully within the global marine and offshore market for more than 40 years. With bases in the UK, Nigeria and Australia, the company has gained an excellent reputation in the marine industry.

We are looking for a driven Lead Engineer with the ability to lead major overhauls on medium and high-speed engines with a small team.

- Reports to: Operations Manager
- Location: Newcastle Upon Tyne, UK office or near major dock in the UK

The role is based out of Newcastle Upon Tyne, but it is a requirement of this role that the job holder will be prepared to travel throughout the UK and Worldwide sometimes at short notice with anti-social hours when vessels are in port

### Role purpose and Key responsibilities

- Lead major medium and high-speed engine overhauls
- Effective management of a team of engineers, allocating specific tasks on a job-to-job basis
- Delivery of jobs to an agreed timescale
- Investigate faults and identify solutions
- Daily contact with customer on site with progress updates and work scope variations

### Essential criteria

- Medium and High-speed engine and ancillary equipment knowledge
- Management skills including motivation, training and development
- Ability to lead major engine overhauls
- Marine and Offshore industry experience
- QHSE knowledge

### Salary Package

- Competitive salary with overtime and allowances payable
- 25 days holiday
- Company pension

If you have the necessary skills and experience, please send your CV and covering letter to [Lesley-ann.hardman@royston.co.uk](mailto:ann.hardman@royston.co.uk)
